Re: Tower Removal in accordance with Alameda County Adaptive Management Plan

Dear Alameda County Community Development Agency:

In connection with that certain Adaptive Management Plan ("AMP") dated March 10, 2011, this correspondence serves to confirm that EDF Renewable Energy (fka enXco, Inc.) is in compliance with the AMP. EDF Renewable Energy hereby confirms removal of the High Risk Turbines ("HRTs") as defined in the AMP. Included in Exhibit A, enclosed herewith, is a list of the HRTs that have been removed from EDF Renewable Energy Wind Projects located in Alameda County in conjunction with our repowering efforts in Solano County to date. More specifically, the HRTs in Exhibit A have been removed from EDF Renewable Windfarm V, Inc. (fka enXco Windfarm V, Inc. aka WPP89) in compliance with Section 1(f) of the AMP which provides, in relevant part:

**Adaptive Management Plan: Section 1(f):** If a wind company removes HRTs for purposes of a repowering project or to otherwise satisfy a requirement of section 6, then the County, in consultation with the SRC, will grant that wind company credit for removals of HRTs ranked 8 or greater as part of a repowering project or to otherwise satisfy a requirement of section 6 and the wind company will be eligible to receive credit for such removals toward the removal requirements in section 1(d), as determined by the County based on recommendations of the SRC.

Please confirm your acceptance and agreement regarding EDF Renewable Energy's compliance with the AMP in connection with the removal of the 14 HRTs listed on Exhibit A by signing a copy of this correspondence and returning it as set forth below.

In addition to the HRTs listed in Exhibit A, an additional 42 turbines (also listed on Exhibit A) were removed from EDF Renewable Windfarm V, Inc. project in Alameda County at the same time as part of the same repowering effort. EDF Renewable Energy would like to respectfully request additional credit for these 42 turbines that are unranked or less than 7 toward HRTs Ranked 8 or Greater and credited against EDF Renewable Energy's AMP compliance requirements. Consistent with the requirements of Section 1(f) of the AMP, the 42 turbines were removed in connection with EDF Renewable Energy's repower project. The removal of

these additional 42 turbines is also consistent with the spirit and intent of the AMP and EDF Renewable Energy's ongoing efforts towards reducing avian mortality in the APWRA. Although these turbines are not part of a relocation plan, the removal is in alignment with the objective of the SRC document P70 relocation guidelines that refers to tower removals and the reduction of high risk situations. With these removals we have eliminated any potential high risk situation as this project has now been completely removed from the APWRA.

Should you have any questions please contact Kyle Lauter (Asset Manager) at 858-521-3411 or Chris Dreiman (Area Operations Manager) at 209-836-1921 x26. If the foregoing is in accordance with your understanding, please confirm your acceptance and agreement in by signing and returning a signed copy to EDF Renewable Energy at the address listed above (Attn: Kyle Lauter).

Sincerely,  
EDF Renewable Energy, Inc. (f/k/a enXco, Inc.)
