Conference Call

As a courtesy to others and to improve sound quality, please mute your phone when not speaking.
You will be on hold until the host opens the conference call.

P3_December 2007 Meeting Notes -- SRC Recommendation on Power Output Data

Counties change permits to require companies to provide power output data for analysis. Data should be weekly from Oct 2005 to current, from now into the future.

Develop a confidentiality agreement between wind farm companies and analytical team to review and analyze wind power information.

P12_February 2007 Meeting Notes -- Power Output Data

The SRC agreed to a set of power output variables that it would like to obtain from wind companies for mortality study data. It agreed to send out an initial request for the following data, to see if it is available:

SRC Agreement to Seek Power Output Data

- kWh per turbine per day
- Operating time per turbine per day (number of 10-minute intervals greater than 0)
- Average RPM per turbine per day with frequency distribution
- From Oct. 2005 forward
- If not available per day, at the smallest time interval available

Follow-Up Required

- County to send letter inquiring what information is available.
- Facilitator to inquire about Brown Act issues with data confidentiality
